

# Exotic Fish and Plants

Exotic fish and plants require precise control of the environment to stimulate propagation of the species. Many growers manage large farms where the variety of species is widely varied and each must maintain the appropriate environmental characteristic and the characteristics must be maintained for specific timeframes. The IT Temperature Monitor is the answer.. as the probes are immersed in the tanks and report the actual environment being experienced by the species. Critical monitoring of the environment maximizes the return on investment.

## Monitoring temperatures in this environment typically involves the following:

- Monitoring Tank Temperatures
- Monitoring Room Temperatures
- Monitoring Outdoor Temperatures
- Monitoring Temp Levels within Tanks

## Purchase Justification:

1. Improved production
2. Better return on investment
3. Improved product quality
4. Competitive advantage

## Typical installation:

Multiple IT Temperature Monitor E4's,    Approx \$1000,    4 or more probes  
Multiple IT Temperature Monitor E8's,    Approx \$1500,    16 or more probes

**Note:** Breeders rely upon data to make decisions that allow them to maximize the revenues associated with their business. Long-term statistics are often very important to professionals to determine trends to maximize revenue.

**Installation Time:** Typical installation time is less than two hours, including the placement of probes.

## Software selections:

Windows	Web	Linux
IP Sentry ( <a href="http://www.ipsentry.com">http://www.ipsentry.com</a> )	EMS ( <a href="http://www.sensatronics.com/ems">http://www.sensatronics.com/ems</a> )	Nagios ( <a href="http://www.nagios.org">http://www.nagios.org</a> )
Tempelert ( <a href="http://www.tempelert.com">http://www.tempelert.com</a> )	Dotcom-Monitor ( <a href="http://www.dotcom-monitor.com">http://www.dotcom-monitor.com</a> )	Big Brother ( <a href="http://www.bb4.com">http://www.bb4.com</a> )
Big Brother ( <a href="http://www.bb4.com">http://www.bb4.com</a> )		
Intellipool Network Monitor ( <a href="http://www.intellipool.com">http://www.intellipool.com</a> )		

## Typical Customers:

Typical customers are those who wish to differentiate themselves from their competition and at the same time manage their production and energy cost associated with production.
